

# Scrum Developer Certification

The Scrum Developer Certification (SDC™) is an entry level certification for Scrum Team members and those who interact with Scrum Teams. This course is not just for technology experts. While Scrum is popular in the IT industry and within IT teams, it is used effectively across disciplines and industries.

The Scrum Developer certification is an essential first step for anyone who is interested in becoming a Scrum Master or who works on or with a scrum team.

There are no formal prerequisites for this certification. However, it is preferable to complete the free Scrum Fundamental Certified (SFT™) course offered by SCRUMStudy.

Learning modules consist of high-quality videos, reference glossaries, case studies and fun puzzles to engage the student.
